Frazier Fits on Orthotics

Share This:

[Frazier Healthcare](#) has acquired [Orthotic Holdings](#), the holding company of [Langer Biomechanics](#), [Arizona AFO](#) and [The Orthotic Group](#), from [Incline Equity Partners](#) and [MTN Capital Partners](#). Through the three brands, Orthotic

manufactures, markets and distributes custom and branded medical products that treat foot-, ankle- and leg-related conditions and diseases. The investment is Frazier's second in the foot and ankle space. The healthcare-focused firm will look to push the company into new channels and acquire smaller orthotic labs in a highly fragmented market.
